SOUTH BEND-LAPORTE, INDIANA, MILK MARKET NEWS

Federal Order No. 67 U. S. Department of Agriculture Agricultural Marketing Service Dairy Division Market Administrator
116 S. William Street 57
P. O. Box 216
South Bend 217 Indiana

Issued for Information of Producers
Who Are Not Members of Cooperative Associations

Vol. I, No. 5

May 1957

## APRIL BASE PRICE \$3.84

Dairy farmers will receive a base price of \$3.84 for April deliveries of Grade A base milk to handlers under the South Bend-LaPorte, Indiana, milk order. The base price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.1 cents for each one-tenth percent that tests vary above or below the 3.5 percent standard.

## APRIL EXCESS PRICE \$3.10

April deliveries of Grade A excess milk to handlers under the South Bend-LaPorte, Indiana, milk order will be paid for at the rate of \$3.10 per hundredweight for 3.5 percent milk and adjusted by the same differential of 7.1 cents as is used for base milk. These minimum prices are subject to a 3 cent per hundredweight marketing service deduction, together with the authorized hauling charges and the 3 percent transportation tax on hauling. For comparative purposes, a uniform price of \$3.73 per hundredweight was computed, which is four cents less than the March uniform price.

### PRODUCER RECEIPTS

Producers delivered 16,440,785 pounds of milk to handlers in April on this market. Of this total, 14,028,384 pounds, or 85.33 percent, was base milk and 11,596,386 pounds, or 70.53 percent, was allocated to Class I. Class I utilization of base milk would be 82.66 percent. The daily average production per farm continues to increase each month, the April 1957 average being 536#, as compared to 519# in March and 450# in April 1956. This represents an increase of almost 12 percent over the daily average of a year ago.

#### CLASS I SALES

Class I sales on a daily basis increased 10.2 percent over a year ago, but remained almost the same as in March of this year. Of the various products included in Class I sales, all are on the increase, with the exception of flavored milk or drink and coffee cream. Coffee cream sales have been on the decrease since the inception of cereal milk on the market.

#### COTTAGE CHEESE

The first month for cottage cheese as a separate class under the order shows that 9.5 percent of the total producer receipts was used to produce cottage cheese. On a comparative basis of the cottage cheese for a year ago, this month is about 88 percent higher. However, milk going off the market to a non-handler classified as Class II cottage cheese for April 1957, did not have to be accounted for in April of 1956 as cottage cheese in a separate class, so this accounts for some of the difference.
